Subject: Harbor Comments

I am submitting several comments on the proposed Portland Harbor Superfund Cleanup Plan. I find it woefully inadequate.

1-Not enough of the river is proposed for cleanup. At least 1000 acres of polluted sediment should be removed from the river.

2-"Monitored Natural Recovery"= do nothing. This is not acceptable.

3-I would like to see the river clean enough that no fish consumption advisories are needed within 15 years.

4-I don't understand how a toxic waste disposal dump WITHIN the river makes sense. Toxic wastes should be completely removed from the river and disposed of so that they are no longer IN THE RIVER poisoning wildlife.

5-It makes sense that the companies that polluted the river should pay to clean up the river.

Sincerely,
